🌐 GitHub: <https://github.com/chathu-02>

SUMMARY

IT undergraduate specializing in full stack web development with hands-on experience building scalable applications using the MERN stack and modern frameworks like Next.js. Strong foundation in REST APIs, database design, and responsive UI development. Experienced in integrating AI-based features and deploying production-ready applications. Seeking a Full Stack Developer internship.

PROJECTS

Startup Connector Platform (Next.js + Prisma DB)

🌐 GitHub: https://github.com/PrabodhaLakshan/Uni_nexus

- Developed a platform connecting startups with students for gig-based collaboration
 - Built features for startup registration, gig posting, and student application workflows
 - Implemented a skill-matching system to recommend suitable candidates based on required skills
 - Enabled gig bookmarking (save feature) and application tracking for users
 - Developed real-time chat functionality to support communication between startups and applicants
 - Designed RESTful APIs and managed full stack integration for user and gig management
-

Smart Campus Management System (Spring Boot, MongoDB)

🌐 GitHub: <https://github.com/PrabodhaLakshan/it3030-paf-2026-smart-campus-3Y1S-WD-38>

- Developed a ticketing and technician management module for reporting and resolving campus resource issues
 - Built RESTful APIs using Spring Boot for ticket creation, assignment, and status tracking
 - Designed a scalable MongoDB schema with collections for users, resources, tickets, and comments using referenced relationships
 - Implemented a Technician Dashboard to manage tasks, update statuses, and track resolution progress
 - Enabled file attachments and comments to provide proof of issue resolution
 - Tracked technician performance by measuring task completion time against assigned deadlines
-

SmartBook-AI (Next.js + prisma)

🌐 GitHub: <https://github.com/chathu-02/SmartBook-AI>

Built an AI-powered appointment booking system using natural language processing to extract user intent and automate booking workflows

- Developed full stack architecture using Next.js, TypeScript, Supabase, and PostgreSQL
- Implemented secure authentication and admin dashboard for managing real-time booking data

AURAGEM CUSTOM (E-commerce Platform)

 GitHub: <https://github.com/chathu-02/e-commerce-website>

 Live: <https://aura-gem-store-final.onrender.com/>

- Developed a full stack e-commerce system using React.js, Node.js, Express.js, and MongoDB
- Implemented authentication, product management (CRUD), and shopping cart functionality
- Designed UI/UX using Figma and built responsive interfaces with Tailwind CSS
- Built admin dashboard to manage orders and customer data

Salon Laaro (Salon Management System)

 GitHub: <https://github.com/chathu-02/Salon-Management-System>

- Built a MERN stack web application to automate booking and service management
- Developed RESTful APIs and real-time booking features
- Implemented secure user authentication and dashboard features

Personal Task Manager (Android App)

 GitHub: <https://github.com/chathu-02/Personal-WellnessApp>

TECHNICAL SKILLS

Languages: JavaScript, Java, Kotlin, PHP, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot

Databases: MongoDB, MySQL, Supabase (PostgreSQL)

Testing & Tools: Git, GitHub, Terilo, Postman, Playwrite

Concepts: REST APIs, MVC Architecture, Authentication, Responsive Design

EDUCATION

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT)

 2023 – Present

Diploma in English & IT

ICBT Kandy Campus | 2022

CERTIFICATIONS

MongoDB Node.js Developer Path – MongoDB University

Generative AI Fundamentals

MongoDB JAVA Developer Path – MongoDB University

MongoDB Python Developer Path – MongoDB University
